

# DO YOU HAVE MEDICAL DEBT?

## SHARE YOUR STORY

Medical debt is a crisis in Virginia, impacting countless individuals and families. This burden is often the result of unavoidable illnesses—nobody chooses to get cancer or suffer a heart attack. Yet, these circumstances force many Virginians into financial hardship, compounding the already overwhelming emotional and physical challenges of their health conditions.

We need your help to pass critical legislation that will protect patients from the financial burden and emotional toll of medical debt.

Every story is powerful. The most effective way to inspire a lawmaker to take action is by sharing your personal experience. **Whatever brings you to this fight, we want to hear from you!**
